|---------------------------------------------------------------------|----------|
| <b>RELEASE NOTES .....</b>                                          | <b>1</b> |
| <b>INTRODUCTION .....</b>                                           | <b>3</b> |
| <b>GUARDIEN GENERAL.....</b>                                        | <b>3</b> |
| CR11689 IMPROVE PERFORMANCE OF LINKAGE UPDATE PROPERTY CHECKS ..... | 3        |
| <b>SYSTEM UPDATING.....</b>                                         | <b>3</b> |
| CR11647 BATCH CREATE SU VALIDATE PROJECT CODE .....                 | 3        |
| CR11653 BATCH CREATE SU SCOPE VIA CR .....                          | 3        |
| CR11678 DEFAULT TARGET UNSET WHEN ADDING NEW SU.....                | 3        |
| CR11698 SUPPRESS INTERIM DSNULI SUPPORT USING GDN* SKELETONS.....   | 3        |
| <b>UPLOAD ASSISTANT.....</b>                                        | <b>3</b> |
| CR11663 UPLOAD ASSISTANT AND ARCHIVED TASKS .....                   | 3        |
| <b>PROJECT ADMINISTRATION .....</b>                                 | <b>3</b> |
| CR11665 PROJECT SUMMARY REPORT .....                                | 3        |
| <b>XOS.....</b>                                                     | <b>4</b> |
| CR11669 LOAD XOS AUTO-ADD DELIVERABLES .....                        | 4        |
| CR11673 MINOR VERSION ISSUES WITH RELATIVE PATH.....                | 4        |
| CR11675 XO PROCESS WITH PARAMETERS > 80# .....                      | 4        |
| <b>GENIE PLUG-IN .....</b>                                          | <b>4</b> |
| CR11671 SEARCH AND REPLACE TEXT ISSUE .....                         | 4        |
| <b>GENIE PACKAGING.....</b>                                         | <b>4</b> |
| CR11651 z/LIBS DISPLAYED IN ONLINE LIST.....                        | 4        |

## Introduction

---

Changes marked with a ‘\*\*’ indicate fixes to high severity issues and it is highly recommended that the service pack is installed if you are likely to be affected by these issues.

Changes marked with a ‘\*’ indicates fixes to medium severity issues or a change in behaviour and again it is recommended that the service pack is installed if this issue is likely to affect you.

## GuardIEn General

---

### ***CR11689 Improve performance of linkage update property checks***

---

Improved the performance of linkage update when linkage properties (name, role changes) are checked for linkage role limits of models in the same system release as the model being assessed (only checked if parallel development set to YES).

## System Updating

---

### ***CR11647 Batch Create SU Validate Project Code***

---

The project code specified in the GD54 parameters is now validated.

### ***CR11653 Batch Create SU Scope via CR***

---

When scoping a System Update, you can optionally include Release Packs in the scope by specifying CR numbers. The CR must be associated to a Release Pack.

### ***CR11678 Default Target unset when adding new SU***

---

When adding a new development/system update, if the override target checkbox is ticked and then un-ticked, the default target is unset causing a warning when attempting to proceed to the next panel. If the override target checkbox is unticked, the default target is now re-evaluated.

### ***CR11698 Suppress interim DSNULI support using GDN\* skeletons***

---

The limited interim support for DSNULI, using altered CA Gen skeletons, has now been withdrawn as formal support is available in GuardIEn 8.7 using CA Gen’s support for this functionality at CA Gen 8.6.

## Upload Assistant

---

### ***CR11663 Upload Assistant and archived tasks***

---

If an upload task is archived and not either deleted or left in the completed state, then a subsequent upload for the same model and subset prompts the reuse of the same task/CR. Archived tasks are now not considered in this check.

## Project Administration

---

### ***CR11665 Project Summary Report***

---

The headings for the Linkage Roles section in the project summary report have been changed to make them more readable.

## **XOS**

---

### ***CR11669 Load XOS Auto-add deliverables***

---

The auto-suggested deliverable name when loading external objects now uses a substring of the suggested name plus a unique suffix when the suggested deliverable name is already used. Previously this was restricted to 9 attempts and only when the name was less than 32 characters.

### ***CR11673 Minor Version issues with relative path***

---

If an external object checkout file name contains a relative path then there are issues storing and viewing the minor versions.

### ***CR11675 XO Process with parameters > 80#***

---

If a parameter for an XO process exceeds 80 characters it is truncated. Longer parameter values up to 240# are now supported for the CSE platform.

## **genIE Plug-In**

---

---

### ***CR11671 Search and Replace Text issue***

---

When using the genIE Search & Replace Text plug-in function to replace a text string with a replacement that contains the search term, the replacement string will contain duplicated elements of the replacement string, for example if the search string is xyz and the replacement string axyz, then a replacement of a string xyz will result in aaaaaaaaaaxyz.

## **genIE Packaging**

---

---

### ***CR11651 z/Libs displayed in Online List***

---

When displaying online load modules, z/OS Libraries are also displayed.
