

Release 2.5
Release Notes

New Features & Enhancements

CR 65 Group Views

Group views are now fully expanded, not just the top level

CR 66 Step over

A new function to step over a USE statement, i.e. execute the called action block, but do not trace it

CR 130 Inspect views

A number of enhancements has been added to the inspect view function

- A Right click menu is available for more statements (CASE OF, CREATE, UPDATE, READ, IF and USE)
- Inspected views are remembered between action blocks
- A new function to copy to inspect view from the 4 view windows

CR 138 Code Page 1141

Added support for codepage 1141

CR 141 Breakpoint on current subscript

If the source code post processor is in use it is now possible to break on current subscript
