

Release 2.5.10
Release Notes

Fixes

CR 169 COMP-3 fields

If the value of a COMP-3 field is updated via the views dialog, the value is truncated if the attribute has decimal places defined.

CR 171 Sorting Views

When the options specify that views are to be sorted, they are not always sorted into the correct sequence

Enhancements

CR 167 Admin Client additional fields

The xTrace Admin client now shows the Monitor ip address and port

CR 168 Exitstate message when model not found

If the model for the generated code is not found (based on name or id) then a runtime error occurs when getting the exitstate message. A warning is now issued instead.
