

Release 2.5.5
Release Notes

Enhancements

CR 162 View Report

The View dialogs now allow you to produce a report displaying the current view data. To produce a text report displaying the current view data, press the View Report toolbar button. Note that if you select a group view, then the group view report is produced instead.

Fixes

CR 159 Call Stack Incorrect

The Call Stack detail columns are not reset when opening a new call stack causing the data to be incorrect

CR 160 Incorrect Data displayed when multiple inner group views

When displaying the view data for a nested group view, if the inner group contains multiple group views at the same level the view data displayed for the second or subsequent group views at each level is not correct.
